

Raising the bar for patient care

Alex's **cloud-native platform** architecture, ensures advanced technology e.g. telemedicine, allow you to engage with patient anywhere and anytime.

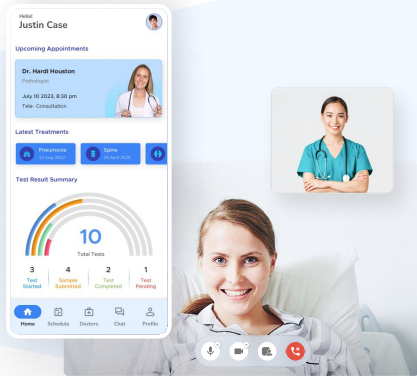

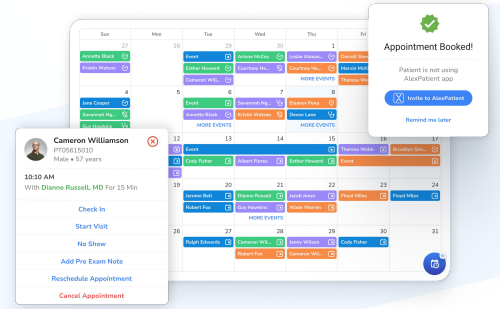

Re.Imagine.Health.Care™
Shape Future, Shift Fast

Streamline your workflow

Organize your work day

Alex Clinic's appointment module is 1-click access for rapid scheduling of new and established patients.

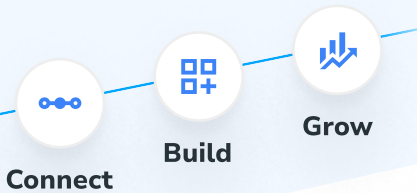

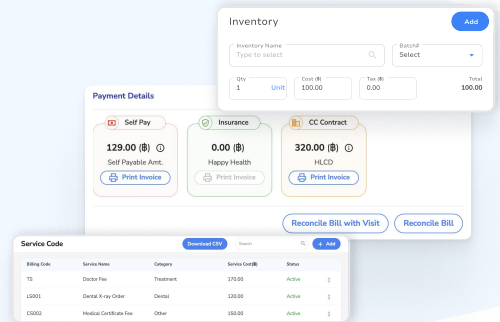

Putting Patients at the Forefront

Nurture lifelong Patient-Doctor bonds with prompt communication. Get your patients to use Alex Clinic & make healthcare even more accessible with telesales and telemedicine. Provide diagnosis or prescribe medicines from any part of the world in just a few clicks.
Increase ~10-20% revenue with automatic simple appointment reminder.
Stay connected and build strong relationships with patient mobile app.

Manage your business

Alex Clinic will let you organize inventories, service fees, bills as robust as you want it to be, from simple management of supplies on hand to monitoring revenue.

Freedom from painful paperwork

Digitize medical notes and documents in a systematic flow from history, diagnostics, treatment, and prescriptions. Present high quality visit report with image based professional grade information to **impress** and build **strong** relationship with patients.
